Allowable Subject Matter

Claim 1-13 are allowed.

The following is an examiner's statement of reasons for allowance: As per claim 1, Ho was relied up to disclose to resolve contention by transferring data based on idle times of the other channels. Yonge, III was relied to disclose to resolve contention based on channel access priority. A thorough review of the prior art fails to disclose the specific conditions of "if said channel intends to re-initiate said channel program, setting a first combination of bits in said re-initiate field of said status-acceptance packet operable for indicating that said channel will re-initiate said channel program, after a first time period; if said channel intends to re-initiate said channel program, setting a third combination of bits in said re-initiate field of said status-acceptance packet operable for indicating that said channel will re-initiate said channel program, after a second time ,if said channel does not intend to re-initiate said channel program, setting a second combination of bits in a re-initiate field of a status-acceptance packet operable for indicating that said channel will take no further action; transmitting said status-acceptance packet to a control unit; and re-initiating said channel program in response to said re-initiate field being set by at least one of said first and third combination of bits." Independent claims 3, 8, and 13 recite similar claim limitations. Claims 2, 4-7, and 9-12 are allowed due to its dependency on independent claims 1,3, and 8, respectively.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably

accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
